- Working knowledge of Defect Tracking tools
- Knowledge of QA automation and performance testing is good to have and will be an added advantage.
- Experience in QTP is preferred

About Wooqer

Our Journey

Wooqer is a one of its kind journey where profitability comes first. With customers who genuinely get value from the product and are willing to pay for it, scale is a natural next step. And that's the next phase of the Wooqer journey. We are preparing for growth.

The already available Creator tools that users love to use and the hundreds of apps users have self created on the Wooqer Super App form the foundation for our growth. Global expansion, New selling methodologies, Marketing focus and a B2B apps marketplace shall make it happen.

At Wooqer, Intelligence is hygiene and Execution capability a necessity. We build things right and blow customer expectations away, every single time. We chase crazy big goals, take full ownership, deliver excellence and celebrate our successes. We pay attention to detail and are right..most times as we simplify work for self and users. We are building the future. Today. And last but not the least, we are frugal. After all, we are still building a profitable company.

Our Leadership

Vishal Purohit
